

## Headset Hookswitch Control for Cisco Unified IP Phones

The Jabra 14201-16 HHC Adapter enables remote Headset Hookswitch Control (HHC\*) with Jabra wireless headsets and the latest generation of Cisco Unified IP Phones.

This means that users can hear ring tones, answer and end calls, adjust the volume or even mute the call up to 300 ft. away from their desks. The integration of handset and headset allows users to benefit from enhanced mobility and the ability to multitask while on a call. The wireless freedom improves work efficiency and ergonomics throughout the day.

### How it works

The HHC Adapter is a plug-and-play solution that converts from the HHC standard used in Cisco phones to the DHSG standard used in Jabra headsets – and vice versa.

### Handset-Headset compatibility

The HHC Adapter is compatible with the new suite of Cisco Unified IP Phones released September 2007: 7942G, 7945G, 7962G, 7965G and 7975G. Cisco Unified IP Phone release 8.3(3) will enable the HHC functionality. For more details see [www.jabra.com/cisco](http://www.jabra.com/cisco).

\* HHC = "Headset Hookswitch Control", Cisco interface specification

The HHC Adapter can be used with the following Jabra wireless office headsets:

### Jabra GN9350

Wireless dual-function\*\* headset that enables users to switch between PC-based VoIP and a desk phone. It offers conference call capability, up to 300 ft range, three wearing styles, up to 9 hours talk time plus optional battery for 'around-the-clock' talk time.

### Jabra GN9120 EHS\*\*\*

Award-winning wireless headset offering up to 300 ft range, three wearing styles, conference call capability and up to 8 hours talk time.

### Jabra GN9120 DUO EHS\*\*\*

Dual speaker version of GN9120 EHS optimized for noisy open office environments.

\*\* When the USB link is active calls must be answered using the headset's button or its base rather than the Cisco Unified IP Phone

\*\*\*GN9120 EHS Series available late Q1, 2008
