JABRA GN2000 CIPC FOR CISCO IP COMMUNICATOR

WIDEBAND VOIP FOR SUPERB CALL CLARITY

- Certified for Cisco IP Communicator (CIPC)
- Plug-and-play USB headset, no drivers needed
- Wideband audio quality for clearer calls
- Noise-canceling microphone eliminates background noise
- Enhanced durability, long service life
- Choose between mono or duo speakers

ENHANCED USER EXPERIENCE - EASE OF USE

The Jabra GN2000 CIPC headset enhances the user experience with the Cisco IP Communicator softphone by providing intuitive inline call control and crystal clear audio, even in noisy work environments.

The headset is certified for CIPC, meaning you can simply plug-and-play with your Unified Communications voice client. Just plug it into the USB port and you're ready to go. CIPC will automatically recognize the device, and you can answer/end calls and adjust volume levels via integrated inline control buttons on the cord.

VOIP WITH SUPERIOR CALL CLARITY

The Jabra GN2000 CIPC headset series raises expectations of a professional grade headset in terms of durability, comfort and quality.

While most "wideband" headsets cut-off around 4,000 Hz, the Jabra GN2000 CIPC provides a full frequency response up to

6,800 Hz. This reduces misunderstandings and communication difficulties.

The headset features a noise-canceling microphone to combat background noise and PeakStop™ technology that protects the users hearing by cutting off sudden loud noises.

Jabra GN2000 CIPC is available with mono or duo speakers. See back page or www.jabra.com/cisco for more details.
