

Plantronics PerSonoCall and PerSono®Suite software provide the link between your Plantronics wireless headset and the softphone application on your PC. This software gives you the ability to remotely detect and answer/end a call via the headset call control button. If your softphone of choice is not listed as being supported you can still use your Plantronics headset as an audio device without the ability to remotely detect and answer/end a call. Note: This compatibility list is updated frequently so be sure to always check the Plantronics webpage for the latest information.

Vendor	Softphone	PersonoCall Compatible	PerSono®Suite Compatible
