

Plantronics Voyager™ *Bluetooth*® Mobile Headsets

Sound Performance Counts

If you are looking for performance, look no further than the Plantronics Voyager family of *Bluetooth* headsets. Whether you are in the car, on the train, or in an airport, you can tune out the world and focus on what's important—clear conversations, professional sounding business calls, or even full-spectrum stereo music. Gain hands-free convenience, making it easier to talk and stay focused on the road or other tasks. The Voyager family also lets you multi-task, with the ability to stay connected with two mobile devices—like a personal phone and a business phone.

The Plantronics Voyager 500 series headsets offer innovative noise reduction features that minimize distracting wind and background noise so callers hear you—not your surroundings. The 800 series offers Plantronics AudioIQ® two-way noise reduction technology, which digitally enhances sound quality on both sides of the call. With the Plantronics Voyager 855, enjoy superb stereo music on your music-enabled phone and conveniently switch to calls with the same headset. The Plantronics Voyager 815 and 855 models feature a sliding boom that brings your voice closer to the microphone, and is a convenient way to answer/end calls. Both models include a unique noise-isolating ear bud that seals out distracting noise and seals in sound. Whether you are speaking or listening—sound quality counts and Plantronics Voyager headsets deliver.
