

Special features

All our headsets are the result of extensive research and come with special features designed to meet specific applications. It makes life just so much easier!

Smart cabling

Sennheiser Communications provides a smart, flexible and future-proof universal headset solution. The *Easy Disconnect* system allows the headset to be connected to or disconnected from the bottom cable quickly and without hassle.

The *Smart Cable* system allows the headset to plug into any source of communication.

If you update the telephone system, simply connect with the correct headset cable. You only need to change the bottom cable - not the headset itself.

Special features

UI 700-series

For even greater comfort and ease of use connect the headset via one of the UI (Universal Interface) boxes. All boxes facilitate convenient switching between handset and headset.

Facilitate
easy
communication

The new UI 760 in smart design and with *Sound Clarity System™* is the ideal support for using a headset. The technology effectively filters out background noise and at the same enhances the caller's voice.

If you wish to integrate a PC into the system, you can easily switch back and forth between your telephone and your PC.

Office wireless

CC-series

State-of-the-art headset solutions for professional users: the best choice for extended periods of heavy duty use in very noisy, open-plan offices and contact centers

SH-series

Top quality headset solutions for demanding users: the stylish and high-quality solution for users who value extremely high comfort and the best speech quality

BW-series

Business Class wireless office headset: the innovative BW 900 solution – first with intelligent sound quality, 100 meter range and mobile phone compatibility

ActiveGard™

An active guard
for your
hearing

During the course of a day, headset users may be exposed to hazardous incoming noises that can be dangerous to the hearing. A sudden high-pitched acoustic burst can be more than frightening – it can actually cause irreversible damage and pain.

To safeguard users from these imminent dangers, all Sennheiser Communications telecom headsets are equipped with innovative ActiveGard™ technology – a safety feature unique to Sennheiser Communications.

ActiveGard™
